RE: NRES-D-07-000256R1, titled "Development and Testing of the Alzheimer's Disease and Related Dementias Mood Scale".

Dear Dr. Dougherty:

Thank you for your positive response to our revisions. As requested we have added updated references to the review of the literature. We also inserted the instrument as Table 2 and re-numbered subsequent tables.

Regarding your request to post the reviews and our responses online on the Nursing Research Editor's Website page, we would be happy to have this done. An email confirming my co-author's agreement was forwarded to the editorial manager on 6/25/08.

It has been a pleasure to work with you on this manuscript.

Sincerely,

Ruth M. Tappen, EdD, RN, FAAN
