RE: NRES-D-09-00026R1, titled "Preliminary Efficacy of a School-based Academic and Counseling Program for Older School-age Students, Staying Healthy-Asthma Responsible & Prepared"

Dear Dr. Kintner,

I am pleased to inform you that your work has now been accepted for publication in Nursing Research. All manuscript materials will be forwarded to the production staff in the near future for placement in an upcoming issue. In the meantime, please answer the following queries in an email to me, indicating where you would like them placed in the ms:

- 1) Third paragraph of text, 1st sentence ("The purpose of this study was to evaluate... in life activities (quality of life)") -- This information should be placed in a paragraph before methods and a statement about projection for caregivers should be included as well.
- 2) Discussion, 5th paragraph, 1st sentence ("Once efficacy is demonstrated...") -- This is not clear; please restate.

Also, we plan to post your article as a Print Ahead of Publish (PAP) for Nursing Research. PAP is the electronic publication of an accepted manuscript prior to print publication. PAP is ideal for cutting-edge research/important studies that cannot wait the 3-4 months before publication.

Thank you for submitting your interesting and important work to the journal.
