

The following comments were addressed prior to this resubmission.

1. Include sample questions with instrument descriptions: Sample questions were provided in the revised Table 1.
2. Include operational definitions for all concepts: Operational definitions were provided for all concepts in the revised Table 1.

Responses to Checklist Queries:

3. Edit citations of sources to include all authors in the initial reference: All references were cross checked and revised as needed.
4. Supply a running head of less than 50 characters with no abbreviations: Running head was inserted on the title page and in the page header along with the page number.
5. Update Guyatt citation: Citation updated by removing the unnecessary et al. from the citation contained in the reference list.
