RE: NRES-D-08-00163R1, titled "Symptom Clusters in Fibromyalgia: Potential Utility in Patient Assessment and Treatment Evaluation"

Dear Dr. Rutledge,

I am pleased to inform you that your work has now been accepted for publication in Nursing Research. All manuscript materials will be forwarded to the production staff in the near future for placement in an upcoming issue. **In the meantime, please provide the "N" value for Tables 1 and 2; I will include these in the title for each table.**

We would like to post the original manuscript you submitted to Nursing Research on the Nursing Research Editor's Web site [<http://www.nursing-research-editor.com/authors/open.php>] simultaneously with the print publication of your article. The reviews on your manuscript were balanced and instructive.

The posting includes this introduction to readers: At Nursing Research we are taking a first step in open peer review. Readers have found this feature instructive and we have expanded it. Posting information on published manuscripts allows you to read the peer reviews, examine how manuscripts are revised based on them, and understand the contribution of the editorial office. The originally submitted manuscript is posted; you may compare it with the published article. You may review the other manuscripts that have been posted at the URL above.

Would you please send this request to your co-authors when you correspond with them about the copyright form? We will not post the original manuscript without the permission of all the authors. We hope that you will be enthusiastic about this project. We think it will be very helpful to authors of articles in nursing research journals.

Thank you for submitting your interesting and important work to the journal. We look forward to hearing from you.
