RE: NRES-D-08-00232R2, titled "Regional Variations of Cancer Screening Rates Found in Women with Diabetes"

Dear Dr. Marshall,

I am pleased to inform you that your work has now been accepted for publication in Nursing Research contingent on the inclusion of a paragraph on limitations (to be placed in the Discussion before the section Cervical Cancer Screening). Also, there are a couple of minor queries as follows:

- 1) Tables 1 and 3: units of measure are required for columns and rows.
- 2) Table 2: units of measure are required for the two mammogram columns; also, the p value column can/should be replaced by table notes showing significance levels (p values must be greater than 0 as you did on Table 4. These revisions may be emailed to me at your convenience.

All manuscript materials will be forwarded to the production staff in the near future for placement in an upcoming issue. Thank you for submitting your interesting and important work to the journal.

With Kind Regards,

Sherry Handfinger
Editorial Assistant
Nursing Research
