

Ms #2005/027

Communication to Reviewer #4:

Thank you for getting in touch with us about the above manuscript. Based on all of the reviews, the manuscript has been accepted for publication, but it is not too late to ask the author for changes. We will forward your comments about factor analysis not providing evidence of construct validity to the author(s) and ask her/them to change those statements to be more accurate.

The author(s) did test another model. Would you be willing to read the current version of the manuscript and to review the alternative model? If so, I will email it to you.

As always, we value the opinions of our reviewers.

Sincerely,

Sherry Handfinger for Dr. Dougherty, Editor
