

2005/108 Mayberry -- Review #3 (written by Mickey Dougherty)

The approach seems focused on how-we-did-it. The manuscript seems to take the reader from start to finish (almost, because evaluation is not complete), but a narrower focus may improve the manuscript.

The model has multiple steps but it does not seem to be used to organize the ms. It would help the reader if the model headings were used in the ms.

The manuscript is well written and easy to read.
